Biofilm Remover™

Prevent Slime Build-Up in Drain Pans, P-Traps, and Drain Lines. Safe and more effective than bleach, our tablets and strips are specifically designed to prevent white slime build-up. They are more effective and cost-efficient than UV systems. The gel clings for long-lasting effects, helping to prevent thousands of dollars in water damage. With no biological additives, there are no storage restrictions, giving it an indefinite shelf life.

SporeGo®

SporeGO® provides a chlorine-free alternative for mold and mildew prevention, cleaning, and deodorizing on porous surfaces such as wood, concrete, stucco, and roofs. Utilizing a unique antioxidant combined with Australian Tea Tree Oil, it effectively removes mold spores, stems, and roots, while preventing regrowth. This eco-friendly bleach alternative is formulated with surfactants listed in the U.S. EPA's DfE CleanGredients database, making it ideal for various outdoor environments."

Green Pantabs®

Green Pantabs® are designed for both AC and refrigeration systems, these tablets help maintain condensate drain pans, ensuring peak performance and preventing potential problems. They are non-corrosive and extend the lifespan of your equipment by eliminating odors, cleaning scale and sludge build-up, and preventing water damage and overflows. Easy to use, safe, and non-toxic, they are also suitable for closed or sensitive environments.

Condensate Drainpan Conditioner®

The Condensate Drainpan Conditioner® effectively controls slime build-up, preventing consequent pan overflows and bacterial growth, including those responsible for Legionnaire's disease. Additionally, it eliminates musty odors introduced into air handling units from bacterial slime accumulations, ensuring a cleaner and safer environment.

Acid Neutralizer®

Highside's Acid Neutralize® is a highly effective solution for maintaining AC, refrigeration systems and recovery systems! Its compatibility with all refrigerants and lubricants, along with its quick action and prevention of solid residues, makes it a versatile and efficient product. Preventing system burnouts is crucial for the longevity and efficiency of these systems.
